10 WAYS TO KEEP WARM

Who doesn't love the warm inviting glow of a fireplace or the welcoming flame from a lantern? Fire (and heat) can be used for warmth, atmosphere, or just to tell your guests where you would like them to congregate.

Although the rains are finally over (pretty please Event God or Goddess), in the evenings here in wine country there always seems to be a chilly nip in the air. Your guests will appreciate a little warmth to keep them comfortable.

Our **PATIO HEATERS** are the most traditional way to keep your party-goers happy. But there are so many other ways ...

We call these **HOBOS BARS** and you can plan an entire party theme around them, offer toasted some-mores at the end of your event, or simply give everyone a place to hang out and stay toasty while enjoying their beverages.

Lounge areas are the **HOT** trend for events right now. Providing your guests an alternative to sitting at the dinner table for the entire evening. Consider using our **FIRE TABLES** in place of the “oh, so boring” coffee table.

Next up, in our quest for warmth, is Wine Country's answer to the moveable fire pit. This beautiful copper lovely is called the **MONTEREY COPPER FIREPIT** and can be placed just about anywhere you'd like people to gather.

The **MONTEREY FIREPLACE** is larger than it appears, standing nearly 30" high, and is the perfect accent to dramatically define an outdoor space. These are also often used to greet guests at the entrance to a tent.

At just over a foot tall, these **MONTEREY LANTERNS** are great sitting on a dining table or on an accent table in a lounge grouping. There's just something so mesmerizing about a flame.

The rather unusual **FIRESTONE HURRICANE** is a bit more rustic. They blend right into the surroundings when placed on something natural and organic. They look great on stonewalls or simply placed on boulders or rocks in your event space.

Presenting a more modern point of view is our **CONTEMPO FIREPLACE**, which is available in both black and white. These are fun to use as a divider for two sitting areas – both facing in. Or a great addition to a dark and glooming nook in your wine cave.

And finally, add instant sun-like warmth to chilly spaces with our new
RADIANT HEATERS.
